

Radboud Max Planck Internships

Max Planck Gesellschaft and Radboud University offer Master's students of the following Masters programmes a unique opportunity to do internships at Max Planck Institutes for at least 6 months up to a year.

MAX-PLANCK-GESELLSCHAFT

Who can apply?

Students of the following master programmes of Radboud University can apply:

Master's programme	Contact person Radboud University
M Philosophy (research)	Prof. C.R. Palmerino
M HLCS (research)	Prof. J. Oosterman
M CLS (research)	Dr. N. Oostdijk
M Biomedical Sciences	Prof. F. Russel
M Molecular Mechanisms of Disease (research)	Prof. R. Brock
M Biology	Dr. H. Nijssen (io@science.ru.nl)
M Chemistry	Dr. H. Nijssen (io@science.ru.nl)
M Computing Science	Dr. H. Nijssen (io@science.ru.nl)
M Medical Biology	Dr. H. Nijssen (io@science.ru.nl)
M Molecular Life Sciences	Dr. H. Nijssen (io@science.ru.nl)
M Mathematics	Dr. H. Nijssen (io@science.ru.nl)
M Physics & Astronomy	Dr. H. Nijssen (io@science.ru.nl)
M Onderneming en Recht (research)	Prof. C. Jansen
M Artificial Intelligence	Dr. J. Farquhar
M Behavioural Science (research)	Prof. R. Holland
M Cognitive Neuroscience (research)	Dr. A. Koning
M Social and Cultural Science: Comparative Research on Societies (research)	Dr. J. Tolsma

Max Planck Institutes have the right to decline internship candidates.

Which Max Planck Institutes are involved?

Students can apply for internships at all European Max Planck Institutes (MPI), except for the Institute in the Netherlands. An overview of all institutes can be found [online](#).

Funding

Students who are accepted for a Max Planck Internship can apply for an Erasmus+ Traineeship grant. This grant is automatically supplemented with a Radboud Max Planck Internship grant. In total the student will receive 500,- euro per month. Students can apply for this grant via the International Office of their faculty.

Application procedure

- The student approaches the contact person of his or her programme to express interest in an internship at a Max Planck Institute.
- Via this contact person, the Verwaltungsleiter (head of administration) of the relevant MPI is contacted. The student drafts, along with the supervisors an internship proposal. The proposal should include all information needed for the Erasmus+ Learning Agreement for Traineeships.
- The Verwaltungsleiter of the Max Planck Institute approves or rejects the student.
- If the student is accepted, the student informs the International Office of his or her faculty and applies for an Erasmus+ grant. Preferably, at least 3 months before departure.
- The International Office of the faculty will nominate the student for an Erasmus+ grant, including an additional Radboud Max Planck Internship grant.

From this point on, the same procedure is used as for regular applications for Erasmus + grants for internships. The Radboud Max Planck Internship grant will automatically be added to the Erasmus+ grant. The Erasmus+ procedure can be found [online](#).

Deadline: applications can be done year round, it is advised to start the application procedure 6 months before departure.
